I give several sermons, teach series of adult classes, and assist in worship services for local churches in Mississippi and other states each year.

For the past seven years I have been the co-plaintiff and director of a major legal case in Federal Court, "ACLU of Mississippi vs. State of Mississippi vs. Ed King and John Salter." This is an attempt to open the old racist secret police files of the Mississippi State Sovereignty Commission, 1955-1971, on a basis similar to the way Federal files and others are handled, giving privacy protection to individual

citizen-victims. The local press (controlled by Gannet of USA Today) is represented by the local (not National) ACLU which claims "freedom of the press" supercedes individual privacy rights and that private citizens have no more rights than public officials who illegally spied on and created files on private citizens. This is currently back in the U.S. District Court in Mississippi for clarification and implementation although we did win a unanimous ruling earlier from the U.S. Fifth Circuit Court of Appeal ordering privacy rights protected.
